Deputy Minister  
of Basic Education

These Reception year (Grade R) Rainbow Workbooks form part of the Department of Basic Education's strategy to boost South African children's school performance. Research shows that for every year that children are exposed to stimulating activities before Grade 1, they perform better academically in later years – throughout their primary and secondary schooling. Hence this strong focus on learning in Grade R.

The Foundation Phase curriculum requires that Grade R learners are given the opportunity to develop their pre-reading, pre-writing and pre-mathematics skills and outlines the skills they will need to get a solid educational foundation so that they find it easier to learn in Grade 1 and beyond.

The Grade R workbooks therefore aim to assist children in developing these skills and the key initial concepts they need to lay a solid foundation for learning. They are packed with opportunities for children to develop and practise the skills that will prepare them for formal schooling.

Before children formally learn to read they need to find out how to hold a book and turn its pages, and to understand how books work. They need to understand the relationship between the words and pictures in a book and to realise that words on a page are made up of sounds and have meaning. Similarly, before children learn to write, they need to develop their fine motor coordination, to practise the formation of shapes and then to move on to forming letters. These are precisely the skills that these workbooks aim to develop.

We know that all children do not learn at the same pace the Grade R workbooks make it possible for teachers to work at the learner's individual pace and, where necessary, to go backwards and forwards in the book, in line with each child's unique development. The activities will also assist teachers in identifying barriers that children may have in learning so that these can be addressed before the child starts formal schooling.

The workbooks integrate the teaching of literacy, numeracy and life skills across 20 themes using fun and engaging ways to capture young learners' interest and attention. We hope that your learners will enjoy working through the workbook activities as they grow and learn, and that you, as their teacher, will share in their pleasure.

### To the Educator:

Learners need to practise their work before they attempt to complete the activities in their workbooks. For example:

- When learners are required to circle the correct answer, let them first place a marker on the correct answer. They should then check with the teacher that it is correct before they write in their books.
- When the activity requires learners to trace something, let them do it with their fingers first before they do it in writing.

**Please note:** Learners are all at different developmental stages.

If you see that some learners still need attention to develop their fine motor skills, let them practice their work in their lined exercise books until they are confident enough to write in their workbooks.

# Cut outs

### Finger puppets:

Choose 1 animal and write the first letter of your name on its t-shirt. Then write the first letters of 4 of your friends' names on the others.

### Picture dominoes:

Cut out the cards on the black dotted lines and then match the numbers to the correct pictures.

### Memory Game:

Shuffle the cards and pack them out face down on the table. Then, turn 2 cards at a time and see if they match. If they do, put them aside. If they don't put them back. See if you can remember where you put them. The first one to find all the matching pairs is the winner. You can also play snap with these cards.

### Toilet roll animals:

Find some empty toilet rolls. Cut out the rectangles and then glue the large rectangular pieces around the toilet rolls to cover the tubes. Now cut out the heads and stick it on the rolls at the top. Use the animal stickers and paste the faces on the heads as you like it. Paste the arms, legs and tail of each animal on the rolls. You can also draw and make your own animals.

Make some zig zag books.  
Cut on the solid lines and  
fold on the dotted lines.
