Mrs Angie Motshekga, Minister of **Basic Education**

These workbooks have been developed for the children of South Africa under the leadership of the Minister of Basic Education, Mrs Angie Motshekga, and the Deputy Minister of Basic Education, Dr Reginah Mhaule.

The Rainbow Workbooks form part of the Department of Basic Education's range of interventions aimed at improving the performance of South African learners in the first six grades. As one of the priorities of the Government's Plan of Action, this project has been made possible by the generous funding of the National Treasury. This has enabled the Department to make these workbooks, in all the official languages, available at no cost.

We hope that teachers will find these workbooks useful in their everyday teaching and in ensuring that their learners cover the curriculum. We have taken care to quide the teacher through each of the activities by the inclusion of icons that indicate what it is that the learner should do.

We sincerely hope that children will enjoy working through the book as they grow and learn, and that you, the teacher, will share their pleasure.

these workbooks.

Slide, roll and build with 3-D objects

Your teacher will do this activity practically with you to see if the following will balance:

- A box on top of a box.
- A ball on top of a box.
- A ball on top of a ball.
- Two boxes on top of one box.

Boxes, balls and cylinders can roll or slide. Your teacher will give you the following objects to see if it will roll or slide. After doing the activity practically say if the objects will roll or slide.

Find pictures of objects in magazines that will roll or slide and paste it here.
